

Special Carbide Drills

for precise and stable holemaking

ZLY focuses on designing and producing non-standard carbide drills.

These tools help you handle difficult machining conditions and meet special size requirements.

They are made to solve the challenges you face in actual production.

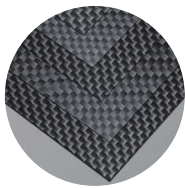

We group our special drills by machining method and by material. You can choose the tool type and the workpiece material from the options below. After that, contact us. We will prepare a drawing and send you a quotation.

Select processing materials

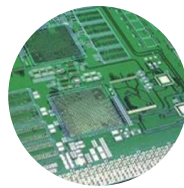

Acrylic

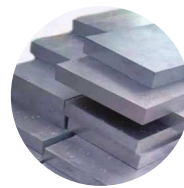

Carbon fiber

Glass fiber

PCB

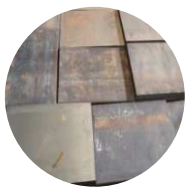

Aluminum

Copper

Cast iron

Ductile
cast iron

Alloy
steel

Hardened
steel

Stainless
steel

Titanium
alloy

Cooling method

Internal Cooling

External Cooling

We can process:

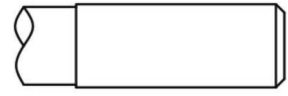

Cutting Diameter: 0.2-35 mm

Cutting Length: 0.2-220mm

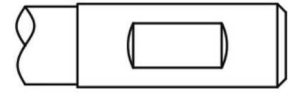

Shank Diameter: 1-32mm

Overall Length: 20-330 mm

Number of Flute: 2-3Flute

Plain shank (DIN 6535 HA)

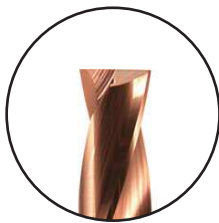

Weldon (DIN 6535 HB)

Select drills types

Twist drill

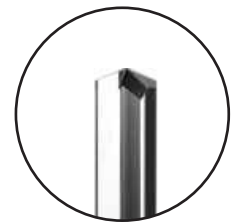

Flat bottom drill

Center drill

Spot drill

Burnishing drill

3 flute drill

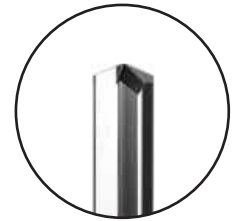

Step drill (one step)

Step drill (two step)

Brad point drill

Drill reamer

When you have decided on the material, product type, and coolant style, send us this information along with your required dimensions or a workpiece drawing.

We will prepare a technical drawing and a quotation for your review.

Looking forward to cooperating with you.
