

Special Carbide Reamers

for exceptional holewall quality

ZLY focuses on designing and producing non-standard carbide reamers.

These tools help you handle difficult machining conditions and meet special size requirements.

They are made to solve the challenges you face in actual production.

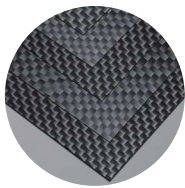

We group our special reamers by machining method and by material. You can choose the tool type and the workpiece material from the options below. After that, contact us. We will prepare a drawing and send you a quotation.

Select processing materials

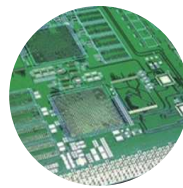

Acrylic

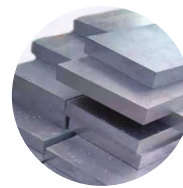

Carbon fiber

Glass fiber

PCB

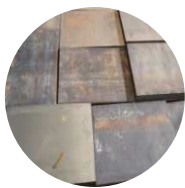

Aluminum

Copper

Cast iron

Ductile
cast iron

Alloy
steel

Hardened
steel

Stainless
steel

Titanium
alloy

Select reamer types

• Right helix

• Left helix

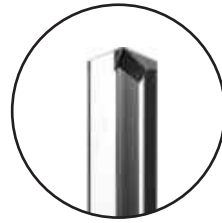

Straight
flute reamer

Spiral
reamer

Step
reamer

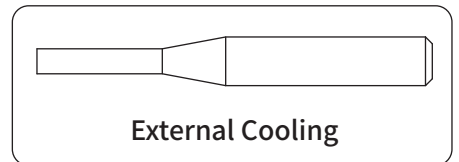

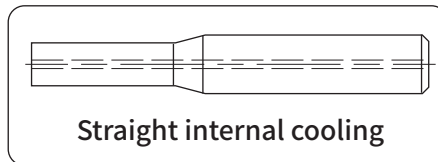

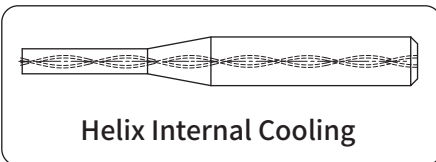

Drill
reamer

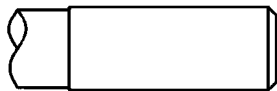

Ball
reamer

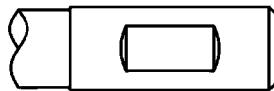

Cooling method

Select number of flutes

Plain shank (DIN 6535 HA)

Weldon (DIN 6535 HB)

We can process:

Cutting Diameter: 0.2-35 mm

Cutting Length: 0.2-200mm

Shank Diameter: 1-32mm

Overall Length: 20-330 mm

Number of Flute: 1-10

When you have decided on the material, product type, and coolant style, send us this information along with your required dimensions or a workpiece drawing.

We will prepare a technical drawing and a quotation for your review.

Looking forward to cooperating with you.
